

Mechanics to write efficient and long running workflows

Siri Varma Vegiraju
Software Engineer

Workflows

- Long running workflows
- Short duration workflows
- Common characteristics
 - Retry mechanisms
 - Saving and retrieving state

Agenda

1

Problem

2

How Dapr helps

3

Live Example

4

Conclusion

Problems

```
{ "vm": "vm-1 .....  
{ "vm": "vm-2 .....  
{ "vm": "vm-3 .....  
{ "vm": "vm-4 .....  
{ "vm": "vm-5 .....
```

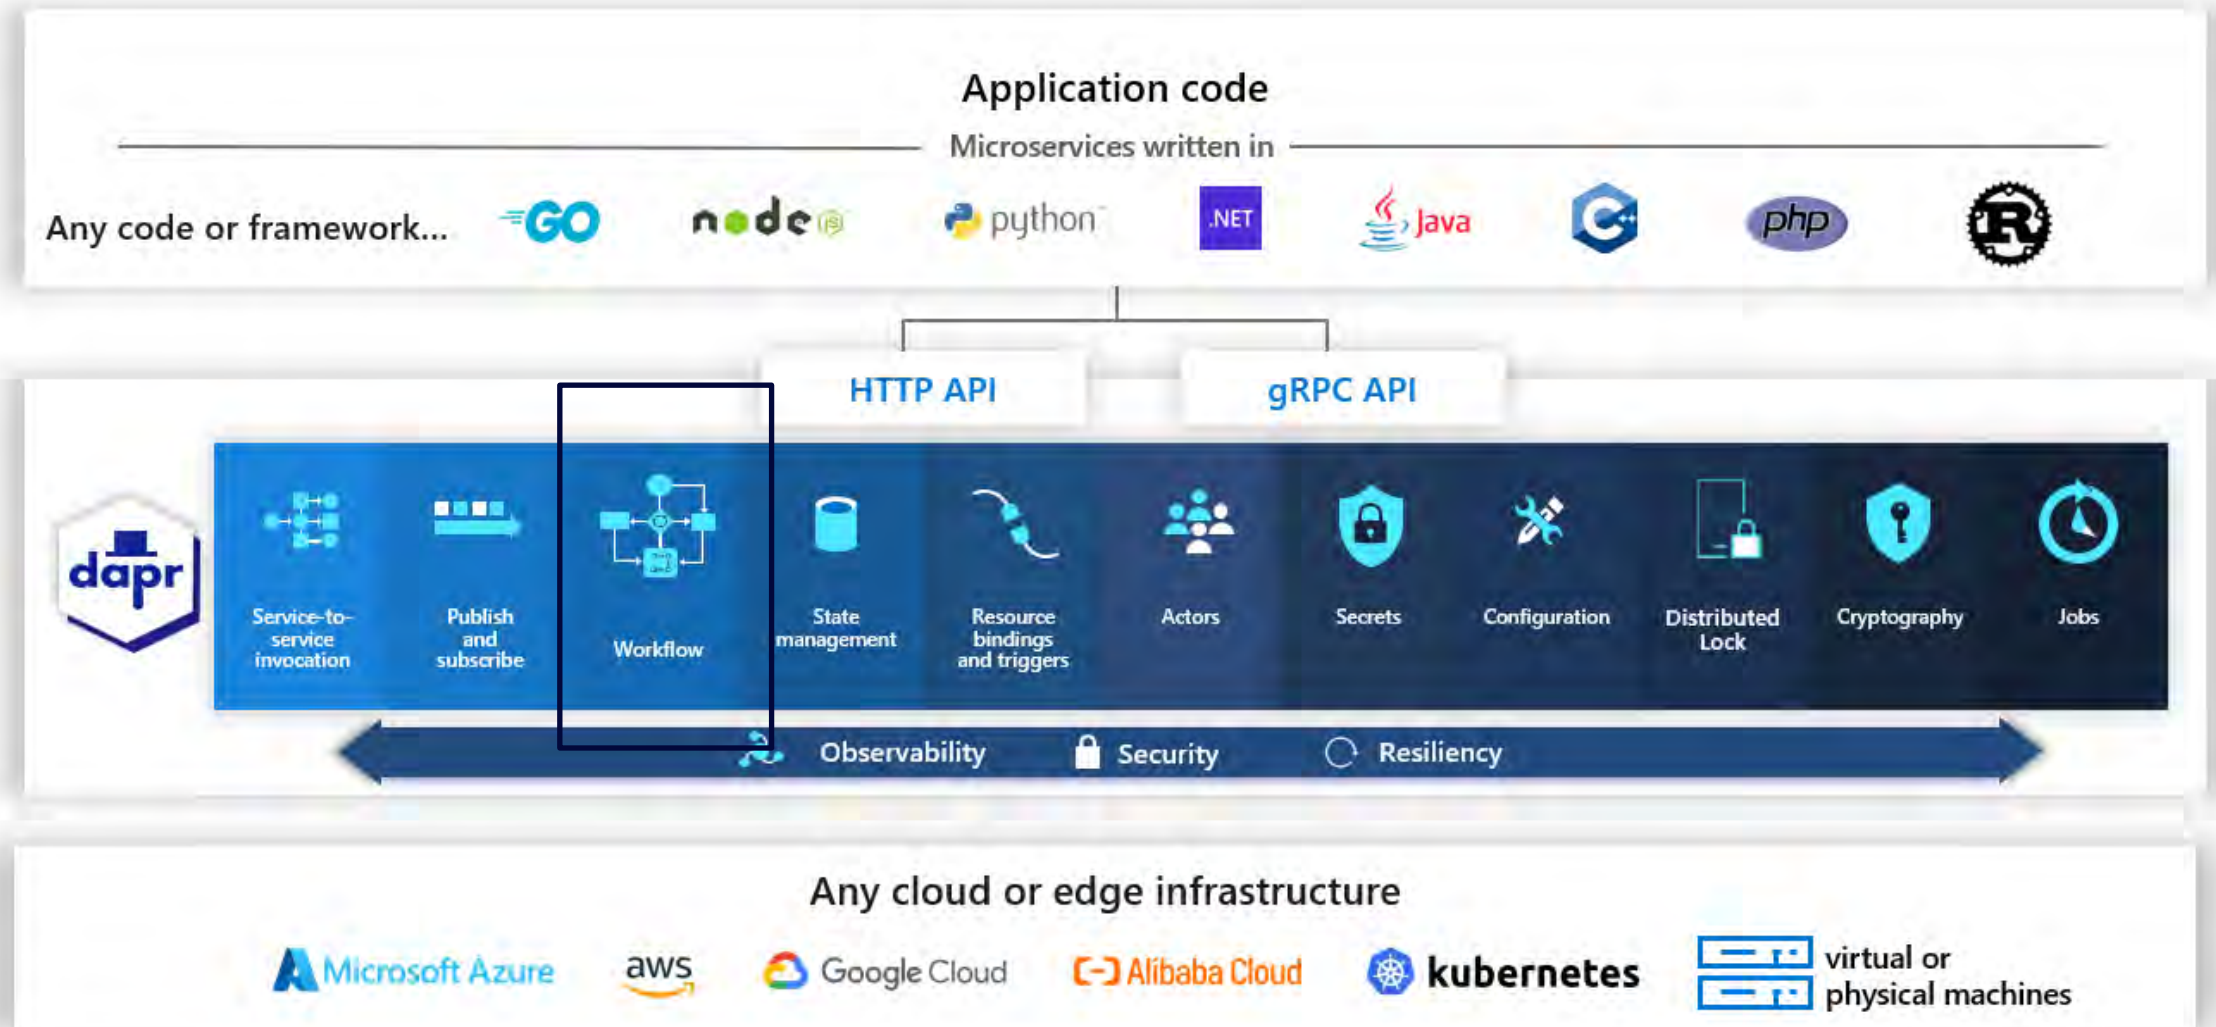

Checkpointing engine complexities

- Schema
- Transactions
- Database
- Observability
- Versioning

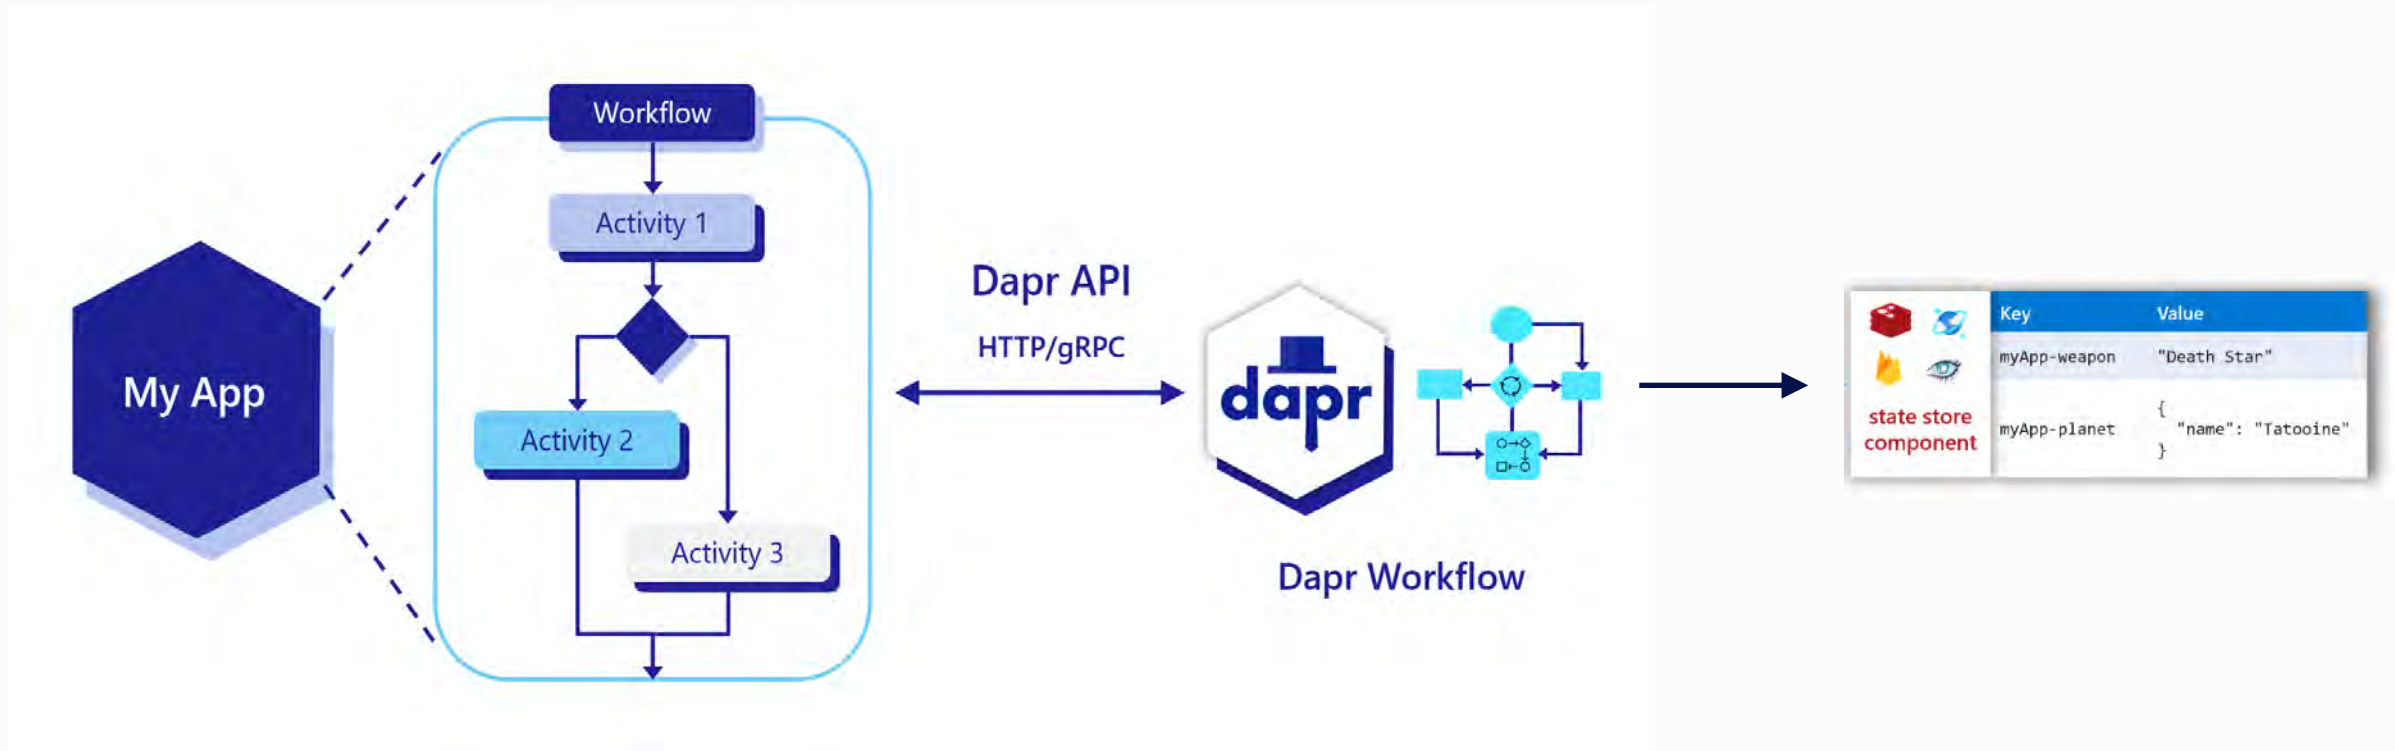

What do we need ?

- Quick recovery from failures
- Checkpointing abstraction

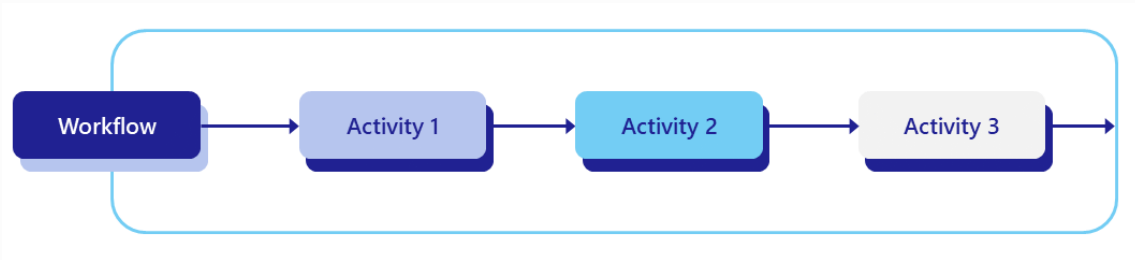

Distributed Application Runtime (Dapr)

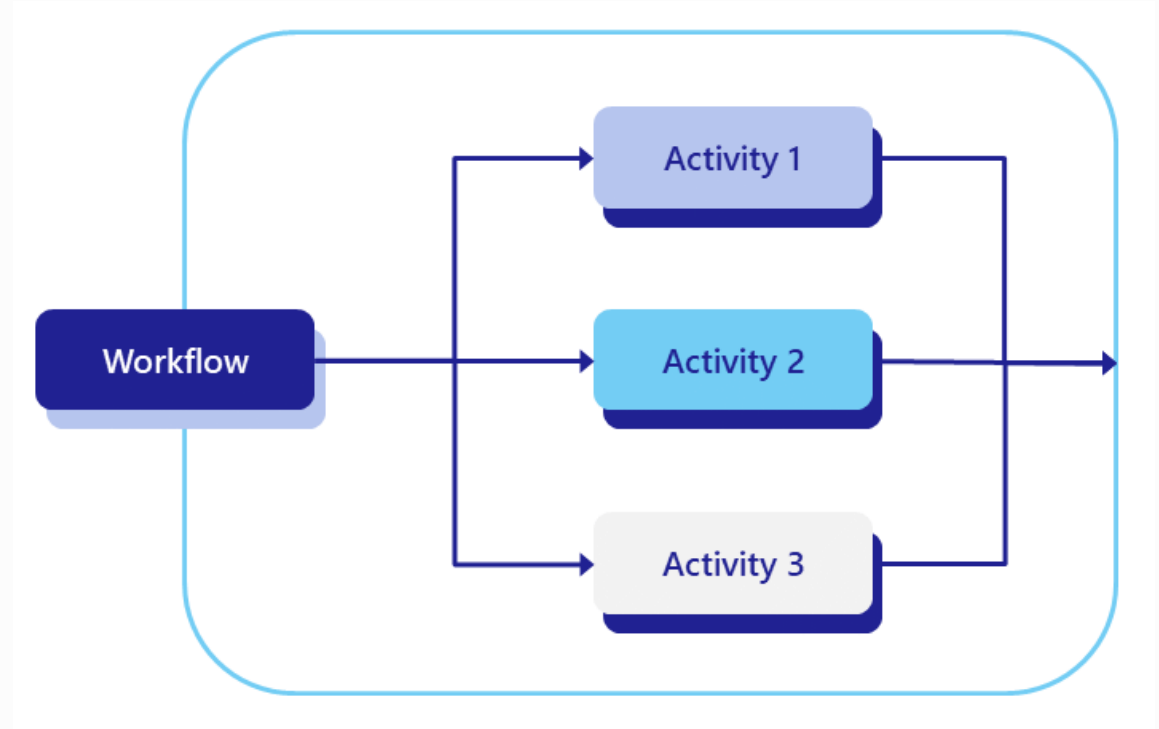

Dapr Workflow

Dapr Workflow Patterns

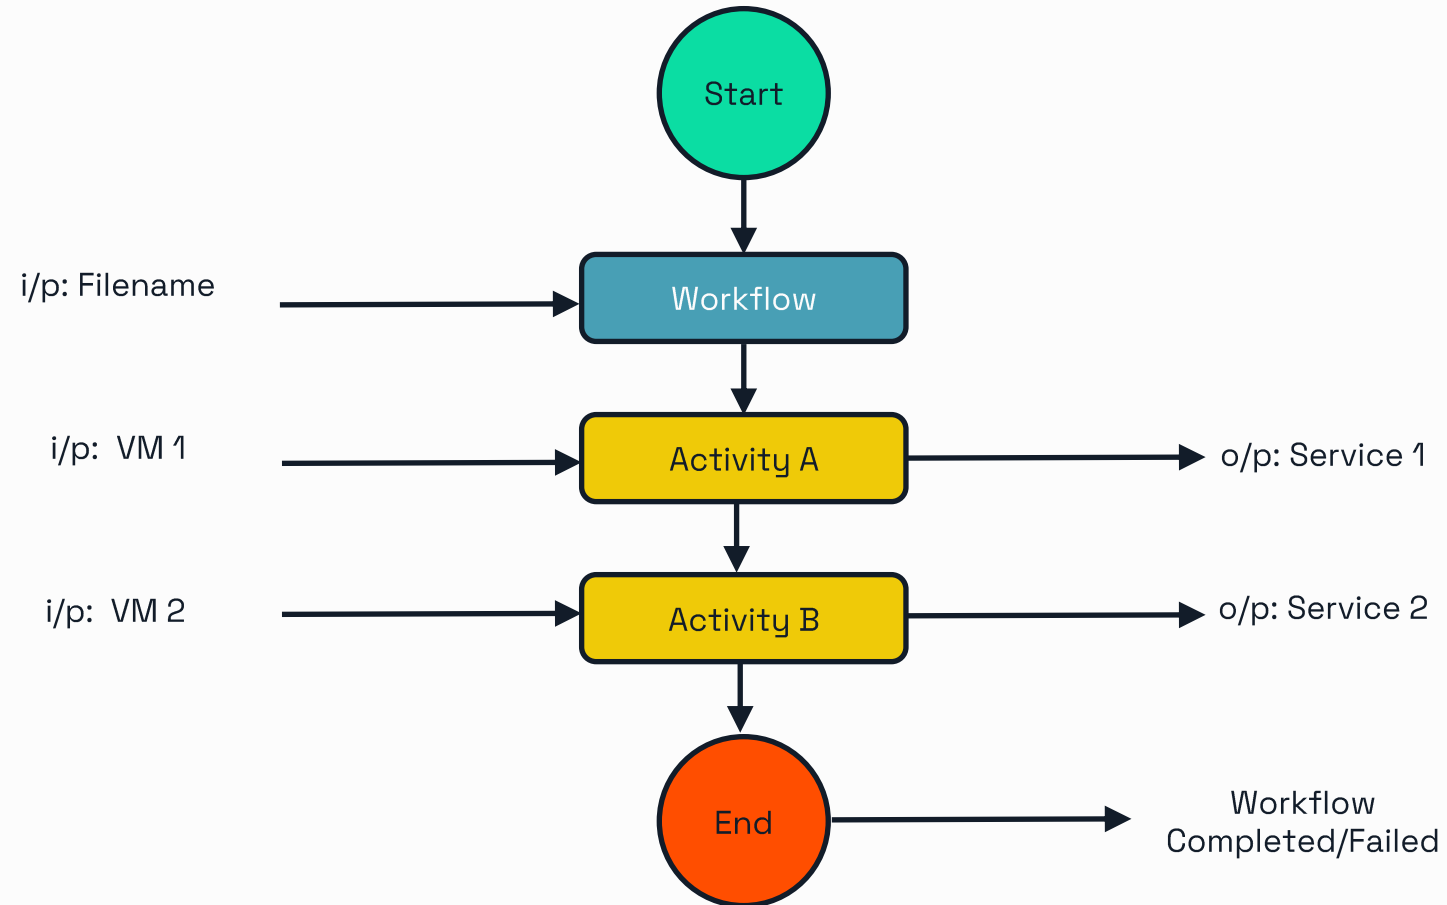

Task Chaining

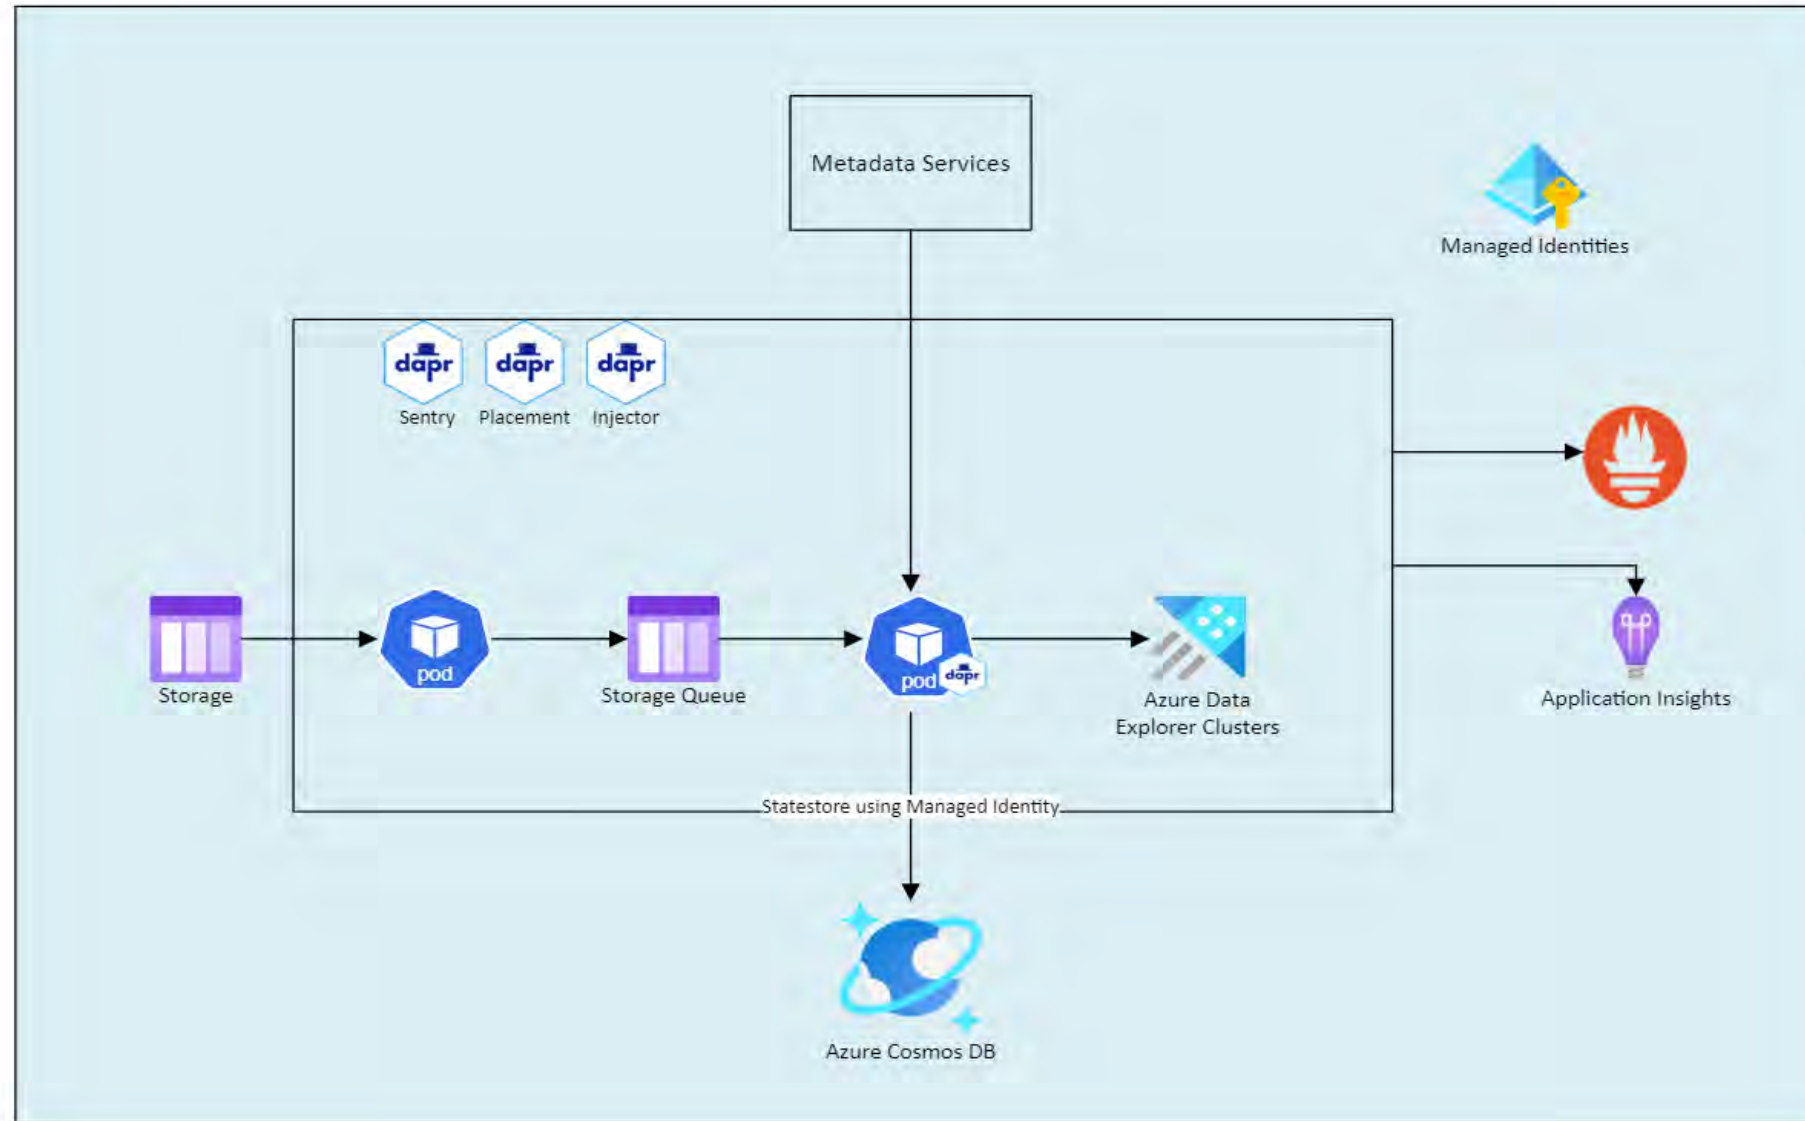

Fan Out / Fan In

Workflow Example

Azure Architecture

Conclusion

- Dapr helps build fault tolerant and durable workflows.
- Ability to run with your Kubernetes environment.

Thank you
